

Counselor Education and Supervision Program Mission Statement

The Counselor Education and Supervision Program at the University of Wyoming prepares counseling professionals for culturally responsive service. We foster the development of clinical excellence and ethical practice through an empirically grounded, humanistic emphasis on the therapeutic relationship across the lifespan. Curricular experiences prioritize the integration of counseling knowledge, skills, and dispositions to prepare students for careers that span global contexts, including rural and marginalized communities. This mission statement reflects our commitment to meet the unique needs of our stakeholders through ongoing community engagement.
