

Speaker: Dr. Liudmila Sergeevna Mainzer (Director of Research Computing at the UW)

Title: Advanced Research Computing at UW

Abstract: Dr. Mainzer will discuss the range of services offered by the Advanced Research Computing Center (ARCC). These include computing support, data storage, training in computational subjects, and collaboration around research topics and joint grant proposals. She will also showcase the current research computing projects conducted at ARCC, and outline the vision for developing the research computing infrastructure in the coming years.
